Ecolotec Signs Major Manufacturing Agreements

Thursday, September 07, 2006, Ecolotec, LLC, Huntsville, AL has announced an exclusive manufacturing agreement with Tool Tec, Inc of Elkton, KY. Tool Tec is a specialty tooling and design company.

Contracts for electrical and pneumatics have also been awarded to Interstate Electric, Columbus, GA specializing in control panel construction and robotics.

Mr. Gary Gilliam, Executive Vice President of Ecolotec said, "We are totally pleased with these two companies' manufacturing capabilities. The agreement with Tool Tec is special because it has been awarded to a company in a small rural community that has lost most of their manufacturing jobs in the past five years."

The Ecolotec MW 200 is designed to process medical waste in hospitals. Ecolotec plans to manufacture more than 20 of these units in the next two years. For more information contact: www.ecolotec.com
